

KECKTECH · PRESENCE OS

Content Properties Guide

Personas, isolation, demos, novel teasers

Operator guide · August 12, 2026
Daily workflow only — Approve, never auto-publish.

Contents (from markdown SSOT)

- JACOB_BOOKS.md
- DEMOS_MSP.md
- MONETIZATION_READINESS.md

Author isolation

- 1 Persona siteKey: jacob-roman only
- 1 Never ship book progress with tech "both" / kecktech / wwfl
- 1 LiT is a **source** only — see [LIT-SHIP.md](#)

Book bibles — confirmed paths (Aug 12 2026 scan)

Working title · Source path · Maturity

The Quiet Field · F:/LiT-author-files · **Partially drafted.** 36 chapter bodies (import-sources/quiet-field-v1/chapters/01-36.md), 16 enriched character profiles, full concept + framework docs, 15 subplots, structured locations/objects/factions, large research corpus. 4 enriched profiles still pending (fatima, padraig, bea, ciaran).

My Disposable Lives · C:/Users/jonkd/OneDrive/Desktop/My_Disposable_Lives_Bible · **Complete bible, no prose.** Premise/framework, full chapter outline, plot + subplots, scene list, principal + supporting characters, world/timeline, DNA-forensics research. Names are proposals, not locked.

Yours, Mine, and the Truth · C:/Users/jonkd/OneDrive/Desktop/yours-mine-and-the-truth · **Complete bible, no prose.** Framework (HIS/HERS/TRUTH/LIVE modes), characters, 28-chapter skeleton across 7 camp days, scene cards, plot + subplots, story-pair bank. All names are placeholders.

101 Perspectives · C:/Users/jonkd/OneDrive/Desktop/101_perspectives_framework · **Framework + one sample chapter.** Part skeletons I–VI + coda, sample chapter (Q9). **Blocked on data:** the Lockbook (35 self-answers + crowd predictions) must be completed, hashed, and locked *before* any survey goes out.

Know Your Number · C:/Users/jonkd/OneDrive/Desktop/know-your-number-book-bible · **Complete bible, no prose.** Core theory, arc, voice guide, running gags, scene templates, story inventory, 14 chapter skeletons + front matter. **Blocked on input:** real story capture (06_story_inventory.md) — 7 drafted premises are placeholders.

LiT / Huxley repo: F:/Github/Huxley → <https://lostinthought.kecktech.net>

Teaser drafts

Reader-facing concept teasers live in [jacob-teasers/](#) — one file per work, YAML frontmatter (title, summary, slug) plus a short literary blog body in Jacob Author voice. Ship them with [ship-jacob-novel-teasers.ps1](#).

Approval rule: teasers ship as drafts only. ME Manager lands the package at `awaiting_approval` and never auto-publishes site or social. Jon approves in Pipeline → Inbox. Do not add any `auto-approve/auto-publish` flag to the ship script.

Ship status — Aug 12 2026 (closeout)

Auth + soft-fail pipeline deployed. Re-ship with `-RetrySuffix r3` landed all five at `awaiting_approval` (Inbox). Matching Jacob CMS drafts via bridge — **not published**.

Slug · Package · Status

101-perspectives · cmsqplbtd0003pyg64zek9akb · awaiting_approval

know-your-number · cmsqpmk2k000fpyg6j9rpavii · awaiting_approval

my-disposable-lives · cmsqnpno9000mpyg66193je8d · awaiting_approval

the-quiet-field · cmsqppcva000tpyg6t5ox51am · awaiting_approval

yours-mine-and-the-truth · cmsqpr7n70010pyg6xm21w57c · awaiting_approval

Daily only: Approve or schedule in ME Manager Inbox (jacob-roman). Do not auto-publish.

Older stalled site_drafted packages from the first attempt can be cancelled/ignored.

Operator rule

After any bible or LiT session:

- 1 Confirm a lost-in-thought / ship package appears in ME Manager Inbox for jacob-roman, **or**
- 2 Log an explicit skip in the daily wrap

Site surfaces

Item · Path · Status

/about author copy · Running Apps/psuedonym-site/app/about/page.tsx → host
/opt/jacob-roman-blog · **Deployed** (VM 304) — https://jacob-roman.com/about

/contact + Graph · app/contact + app/api/contact · **Deployed** (Graph env on host) —
https://jacob-roman.com/contact

ME Manager posts bridge · /api/me-manager/posts* · Live (SITE_HOOKS)

ME Manager projects bridge · /api/me-manager/projects* · Live (parity with WWFL/Keck)

Git · https://github.com/Bizzo1975/psuedonym-site · F:/Github/Running Apps/psuedonym-site

Default ship target

```
{ "targets": { "site": "jacob-roman", "social": true }, "userFacing": true, "source":  
"lost-in-thought" }
```

Dual client content (persona kecktech)

Angle · Audience · Proof

Break/fix IT · Wichita trust / MSP · Reliability, response, senior-safe IT

Development · Buyers of custom apps · Live demos on /demos + Portfolio screenshots

Both use siteKey kecktech with different Inbox angles — not separate siteKeys.

Marketing /demos allowlist (public HTML)

Public [demos.json](#) / <https://www.kecktech.net/demos> shows **only** these ids (unique):

marketlist · flooros · portal · farmbot · cleaner · argo · netops · chat · sovereign-hub · aerocad

Slug aliases when CMS/Portfolio use older names: net-ops→netops, kecktech-portal→portal, chat-kecktech→chat, sovereign→sovereign-hub, syll→aerocad.

CMS syncProjectsToDemosJson **replaces** apps[] with the allowlist (never merge-retain orphans like help/LiT/homepage). After Sync that touches demos.json, run Astro rebuild (/opt/kecktech-astro-rebuild/kecktech-astro-rebuild.sh).

Portfolio catalog (SSOT — can be wider)

Portfolio may hold ops apps (dash, help, Claudette, DebateForge WIP, games) **without** putting them on marketing /demos. Only allowlisted slugs should include kecktech in displaySites if you want them on the public demos page.

After UI changes: ME Manager Portfolio → **Capture UI**.

Weekly: Portfolio Sync — then spot-check /demos still matches the allowlist.

Canonical marketing HTML: kecktech-dashboard/dashboard/website (see CANONICAL.md).

CMS bridges: kecktech/Kecktech/website on :8085 (DEMOS_JSON_PATH=/astro-data/demos.json).

Lead path

- 1 Brand contact forms → Graph / shared mailbox support@ (and brand aliases)
- 2 Log stub lead in ERPNext CRM even at zero clients
- 3 Zammad ticket when work starts
- 4 Do **not** wait for Stripe to start outreach (5 enrichments/week per DAILY-TASKS)

Contact → ticket verification

- 1 Astro contact: dashboard/website + api/contact.php / Graph mailer
- 1 Dash Today + tickets.kecktech.net still opened daily (expect empty until clients)

See [MONETIZATION_READINESS.md](#) for Stripe/portal before first invoice.

Trigger: **before first paying client**, not a new product.

Must-complete (from CUSTOMER-PORTAL-GAP-ANALYSIS)

Gap · Action · Owner

Portal Stripe pay link per invoice · Wire Stripe payment links from ERPNext invoices into portal · Cursor when first client imminent

Portal RustDesk API 404 · **Already fixed** in customer-portal/app/api/rustdesk/route.ts — confirm env RUSTDESK_* on host · Ops verify

Contract / plan card · ERPNext Subscription → portal · Cursor

Invoice history · Paid + outstanding · Cursor

MSA checklist · Legal/ops doc before first invoice · Jon

Keep as-is until volume hurts

- 1 X/Twitter clipboard path (COST_MODEL)
- 1 Games monetization cosmetic / store-later — presence first

Analytics pivot

Weekly: Umami + ME Calendar outcomes → one pivot note in operator log (which property got engagement).

Zero-client ramp

ERPNext CRM: enrich 5 prospects / week; personalized outreach; log outreach_status. Stripe not required to talk to prospects.

Portal RustDesk fix reference

Create on portal host (Dashboard/customer-portal):

app/api/rustdesk/route.ts returning RUSTDESK_SERVER_HOST + RUSTDESK_PUBLIC_KEY JSON (see gap analysis Fix 1).

Do not invent fake invoice/pay flows in prod while client count is zero.
