

KECKTECH · PRESENCE OS

Forge, Games & Ship

Uncle Jon portfolio, Studio approve, ship hooks

Operator guide · August 12, 2026

Daily workflow only — Approve, never auto-publish.

Contents (from markdown SSOT)

- GAMES_PIPELINE.md

Portfolio (ME Manager)

Seed now includes (siteKey display unclejon, stage running_dev):

Slug · Repo

uncle-jons-it-garage · F:/Github/unclejons-itgarage-site

twisted-tavern · F:/Github/twisted tavern

how-dare-you-sir · F:/Github/how-dare-you-sir

squirrel-commander · F:/Github/squirrel-mobile-game

After deploy of seed/upsert: run Portfolio Sync from ME Manager UI, or:

```
POST https://me.willworkforlunch.com/api/portfolio { "action": "sync" }
```

Ship hooks

Each game repo has scripts/me-manager-ship.ps1 posting to /api/events/ship with "targets": { "site": "unclejon" }.

Install git post-commit (from me-manager, pointing at a game repo — or run the ps1 manually after meaningful commits):

```
cd F:\Github\me-manager # Prefer manual ship from game repo until hooks are trusted: cd  
"F:\Github\twisted tavern" .\scripts\me-manager-ship.ps1 -Summary "Describe the change"
```

Requires ME_MANAGER_INGEST_KEY and optional ME_MANAGER_URL (default https://me.willworkforlunch.com).

Forge loop (Jon-only approve)

- 1 Open https://forge.kecktech.net Studio
- 2 Approve or send-back waiting requests (historically 8b14b38e9cc7, 1c189b83ca9e)
- 3 After delivery, run ship with mediaURLs so art becomes Inbox content for unclejon

Agents never auto-approve Forge Studio.
