Daily Journey 1 (canonical)

- 1 Home /dashboard — ops pulse (blocked apps · open issues · Cleaner review · agents down)
- 2 Issues /dashboard/issues — alerts, security tasks, degraded agents/containers
- 3 Quality inbox /dashboard/cleaner?tab=inbox or Apps → app → Quality tab
- 4 Clear flags Accept/Dismiss until pending_high = 0 (HIGH/CRITICAL only; low nits do not block)
- 5 Fleet /dashboard/fleet/agents if pulse shows down
- 6 Security /dashboard/security when chips hot

Product path for quality: **NetOps** → **Applications** → **Quality** — standalone Cleaner (cleaner.kecktech.net) is secondary.

pending_high is written by Cleaner sync / quality run APIs (APPLICATIONS_SUITE.md). It is a metadata field, not a dedicated route.
